

CSS Exercise

1. **Link Stylesheet:** Add a link to the external stylesheet "styles.css" located in the CSS folder within the <head> section of the HTML file.
2. **Add Class to Header:** Assign a class to the header element, such as header-class.
3. **Style the Header:** Use CSS to style header-class by changing its background colour and text alignment.
4. **Create a Navigation Menu:** Add a navigation menu with links to hypothetical external pages like an About page and a Contact page. The actual pages don't need to be created; just the links in the menu.
5. **Enhance Menu Section:** Add classes or IDs to the menu items and style them individually in CSS, such as changing font styles or adding borders.
6. **Responsive Images:** Style the images in the menu so that they are responsive and maintain their aspect ratio.
7. **Style the Opening Hours Table:** Apply CSS to style the table in the opening hours section, including the headers, rows, and columns.
8. **Add Footer Styling:** Style the footer with CSS, changing the background colour and text alignment.
9. **Implement a CSS Grid or Flexbox Layout:** Use CSS Grid or Flexbox to create a layout for the webpage, ensuring the content is well-structured and responsive.
10. **Hover Effects on Menu Items:** Add hover effects to the menu items in the navigation bar, changing their colour or style when hovered over.
